Journal of the Neurological Sciences, 109 (1992) 237–240
Elsevier Science Publishers B.V.

Author index (Vol. 109)

Ang, L.C., Bhaumick, B., Munoz, D.G., Sass, J. and Juurlink, B.H.J.
Effects of astrocytes, insulin and insulin-like growth factor I on the survival of motoneurons in vitro (109) 168
Arai, N., Nishimura, M., Oda, M., Morimatsu, Y., Ohe, R. and Nagatomo, H.
Immunohistochemical expression of microtubule-associated protein 5 (MAP5) in glial cells in multiple system atrophy (109) 102
Arpano, M.M., see Fisher, M. (109) 107

Barbiroli, B., Funicello, R., Iotti, S., Montagna, P., Ferlini, A. and Zaniol, P.
^{31}P-NMR spectroscopy of skeletal muscle in Becker dystrophy and DMD/BMD carriers. Altered rate of phosphate transport (109) 188
Bejaoui, K., see Soussi-Yanicostas, N. (109) 111
Ben Hamida, C., see Soussi-Yanicostas, N. (109) 111
Ben Hamida, M., see Soussi-Yanicostas, N. (109) 111
Bertini, E., see Sabatelli, M. (109) 1
Bhaumick, B., see Ang, L.C. (109) 168
Bianco, N., see Figarella-Branger, D. (109) 69
Bisby, M.A., see Ludwin, S.K. (109) 140
Boucraut, J., see Figarella-Branger, D. (109) 69
Brown, G.G., see Garcia, J.H. (109) 121
Butler-Browne, G.S., see Soussi-Yanicostas, N. (109) 111

Caekebeke, J.F.V., see Van Dijk, J.G. (109) 11
Caekebeke, J.F.V., see Van Dijk, J.G. (109) 18
Calcutt, N.A., Carrington, A.L., Ettlinger, C.B. and Tomlinson, D.R.
The effect of mixed bovine brain gangliosides on hypoxic conduction block in control and streptozotocin-diabetic rats (109) 96
Calore, E.E., see Figarella-Branger, D. (109) 69
Capitani, E., see Nobile-Orazio, E. (109) 200
Carpo, M., see Nobile-Orazio, E. (109) 200
Carrington, A.L., see Calcutt, N.A. (109) 96
Catz, I., see Warren, K.G. (109) 88
Ceroni, M., see Laforenza, U. (109) 156
Ceuterick, C., see Timmerman, V. (109) 41
Comerford, M.J., see Dalton, P.A. (109) 56

Dalton, P.A., Comerford, M.J. and Stokes, M.J.
Acoustic myography of the human quadriceps muscle during intermittent fatiguing activity (109) 56
De Jonghe, P., see Timmerman, V. (109) 41
Delio, D.A., Fiori, M.G. and Lowndes, H.E.
Motor unit function during evolution of proximal axonal swellings (109) 30
Dimitrijevic, M.R., McKay, W.B., Sarjanovic, I., Sherwood, A.M., Svirtlih, L. and Vrbovà, G.
Co-activation of ipsi- and contralateral muscle groups during contraction of ankle dorsiflexors (109) 49

Ettlinger, C.B., see Calcutt, N.A. (109) 96

Ferlini, A., see Barbiroli, B. (109) 188
Figarella-Branger, D., Calore, E.E., Boucraut, J., Bianco, N., Rougon, G. and Pellissier, J.F.
Expression of cell surface and cytoskeleton developmentally regulated proteins in adult centronuclear myopathies (109) 69
Fiori, M.G., see Delio, D.A. (109) 30
Fisher, M. and Arpano, M.M.
Inhibition of stimulated human leukocyte hydrogen peroxide generation by a novel antioxidant, OPC-14117 (109) 107
Fredrikson, S., see Link, H. (109) 173
Fugleholm, K., Toft, P.B. and Schmalbruch, H.
Topography of unmyelinated axons in regenerated soleus nerves of the rat (109) 25
Funicello, R., see Barbiroli, B. (109) 188

Gajdusek, D.C., see Laforenza, U. (109) 156
Garcia, J.H. and Brown, G.G.
Vascular dementia: neuropathologic alterations and metabolic brain changes (109) 121
Garruto, R.M., see Laforenza, U. (109) 156
Graeber, M.B., see Nacimiento, W. (109) 148

Subject Index (Vol. 109)

Acetylcholine receptor, (109) 182
Acoustic myography, (109) 56
Adrenoleukodystrophy, (109) 207
Adult centronuclear myopathy, (109) 69
Agarose gel electrophoresis, (109) 83
Alzheimer's neuropathology, (109) 77
ALZ-50 immunoreactivity, (109) 77
Amyotrophic lateral sclerosis, (109) 215
Antibodies, (109) 200
Antibody, (109) 182
Antibody secreting cells, (109) 173
Antioxidant, (109) 107
Aplastic anemia, (109) 196
Arachidonic acid, (109) 162
Asterixis, (109) 132
Astrocytes, (109) 168
Autoimmunity, (109) 200
Axonal swellings, (109) 30

Becker dystrophy, (109) 188
Blink reflex, (109) 148
Blood transfusion, (109) 196
β-Bungarotoxin binding protein, (109) 173

Calmodulin, (109) 215
Cardiomyopathy, (109) 1
Cerebrospinal fluid, (109) 61; (109) 64; (109) 83
Co-activation of muscle groups, (109) 49
Cognition, (109) 18
Coma-related neuropathology, (109) 77
Complex I, (109) 219
Contralateral early response, (109) 148
Cytoskeleton proteins, (109) 69

Desmin, (109) 1; (109) 111
Development, (109) 69
Diabetes mellitus, (109) 96
Diabetic neuropathy, (109) 96
Distal hereditary motor neuropathy, (109) 41
DMB/BMD carriers, (109) 188
DNA analysis, (109) 41
Down's syndrome, (109) 77
Duchenne carriers, (109) 188
Duchenne dystrophy, (109) 215

Eicosanoids, (109) 162
Electromyography, (109) 56
Electron microscopy, (109) 25
Electron transport system, (109) 219
Event-related potentials, (109) 11; (109) 18
Evoked potentials, (109) 11
Exclusion mapping, (109) 41

Facial nerve palsy, (109) 148
Facial nucleus, (109) 148

Gangliosides, (109) 96; (109) 200
Giant axonal neuropathy, (109) 1
Glia, (109) 102
GM1, (109) 200
Guamanian amyotrophic lateral sclerosis, (109) 156
Guillain-Barré syndrome, (109) 200

Heart disease-related neuropathology, (109) 77
Hexacosanoic acid, (109) 207
HTLV-I-associated myelopathy, (109) 196
Hypoxia, (109) 96

IgG, (109) 200
IgG index, (109) 64
IgM, (109) 83
β,β'-Iminodipropionitrile, (109) 30
Immunogen, (109) 182
Immunohistochemistry, (109) 102
Immunosuppression, (109) 196
Insulin, IGF-1, (109) 168
Interferon-γ, (109) 61; (109) 173
Intrathecal synthesis, (109) 61
Isoelectric focusing, (109) 64; (109) 83; (109) 156

Jerk-locked back averaging, (109) 132

Leukocytes, (109) 107

Macrophages, (109) 140
anti-MBP, (109) 88
Meningitis, (109) 61
N-Methylisoquinolinium ion (*N*-Me-IQ$^+$), (109) 219
N-Methyl-1,2,3,4-tetrahydroisoquinoline (*N*-Me-TIQ), (109) 219
Microtubule-associated protein 5 (MAP5), (109) 102
Molecular structure, (109) 182
Motor neuron disease, (109) 30
Motor unit function, (109) 30
Mouse brain mitochondria, (109) 219
Multiple sclerosis, (109) 11; (109) 18: (109) 83
Multiple system atrophy, (109) 102
Muscle energy metabolism, (109) 188
Muscle fatigue, (109) 56
Muscle ^{31}P-NMR spectroscopy, (109) 188
Muscle sounds, (109) 56
Myasthenia gravis, (109) 173; (109) 182
Myoclonus, (109) 132
Myosin heavy chain, (109) 69
Myosin isoforms, (109) 111
Myotonic dystrophy, (109) 215

N.CAM isoforms, (109) 69
Negative myoclonus, (109) 132
Nerve conduction block, (109) 96
Nerve regeneration, (109) 25
Neurofilament, (109) 1

Ola mice, (109) 140
Oligoclonal bands, (109) 64; (109) 83
Oligodendrocytes, (109) 140
Optic nerve, (109) 140
Optic neuritis, (109) 88
Oxygen free radicals, (109) 107

P300, (109) 11; (109) 18
Parkinsonism-dementia, (109) 156
Phosphate transport, (109) 188
Phosphodiesterase, (109) 215
Predictive validity, (109) 11

Quadriceps muscle, (109) 56

Regeneration, (109) 140; (109) 148
Renal transplantation, (109) 196

Scrub typhus, (109) 61
Soleus nerve, (109) 25
Somatosensory evoked potential, (109) 132
Spastic paraparesis, (109) 196
Spinal cord injury, (109) 162
Spinal motoneurons, (109) 168
Subacute sclerosing panencephalitis, (109) 64
Synaptic organization, (109) 148
Synthetic peptides, (109) 88; (109) 182

T cell reactivities, (109) 173
Thiamin monophosphatase, (109) 156
Thiamin pyrophosphatase, (109) 156
Thromboxane, (109) 162
Titin, (109) 111
Transient co-occurrence of myoclonus and asterixis, (109) 132
Trophic factors, (109) 168

Unmyelinated axons, (109) 25

Very long chain saturated fatty acids, (109) 207
Vimentin, (109) 111
Voluntary muscle contractin, (109) 49

Wallerian degeneration, (109) 140
Werdnig-Hoffman's disease, (109) 111
